Work Experience

- | | |
|-----------------------------|---|
| Unboxed | Developer |
| April 2017 - September 2017 | I created a small webapp to allow easy upload of images to S3, contributed to the UK Government Petitions Website, and done a significant amount of work on <i>char.gy</i> , a startup project. |
| Alliants | Software Developer Intern |
| July 2016 - September 2016 | I worked on a tool designed to store organisational information. This experience improved my Ruby & RoR as well as my TDD. |
| Self Employed | Private Tutor |
| October 2014 - June 2016 | I have committed 4 hours a week over 2 years to teaching. |

Projects

- | | |
|---------------|---|
| February 2017 | UniSecrets at ICHACK 2017 Hackathon
This hackathon culminated in a web-app for university students whereby you can submit anonymous secrets you wish to share across universities. |
| May-June 2016 | Summit
Summit was a platform designed to help anyone learn how to trade using real time data from stocks, without placing real capital at risk. I largely worked on the frontend and made extensive use of Javascript, React and Bootstrap. |

Skills

Computing | Ruby, Java, Haskell, Python, RoR, Web Development, TDD

Languages | Fluent in Portuguese, English & Spanish. Elementary Russian
